

APISWISE
AUTOMATION INTELLIGENCE

BE WISE TO PALLET LABELING

APPLY THE RIGHT LABEL, ON THE RIGHT PALLET,
AT THE RIGHT TIME... **EVERY TIME.**

Why risk it?

Unless integrated correctly, Pallet Labeling stands as the **single greatest risk to your business.**

Go the distance to **optimize the last mile of your manufacturing line** with experienced, expert configuration.

Digitally transform your entire pallet labeling process with an intelligent solution from Apis Wise.

PINPOINT YOUR PRODUCTS

Designed to **empower** plant managers, IT engineers and operations specialists with **seamless traceability**, built-in fallbacks and **ongoing service** with little-to-no downtime, Apis Wise helps you transform your biggest threat into your greatest success.

- Report real-time inventory with potential accuracy greater than 99%.
- Minimize human interfacing and manual intervention.
- Automate with time-stamped traceability.
- Acquire peace of mind with a supportable, sustainable system.
- Protect the ROI in your investment by trusting expert solutions engineers.

SUSTAINABLE SECURITY

Our solution process knowledge maximizes the value between PLCs and database software. Many systems can handle **straight-line logic** when everything works perfectly. Apis Wise is designed to manage the exceptions.

- Failover automation technology switches to backup printer applications or tabletop printers on the fly.
- Built to automatically manage partial Pallet Labeling and reporting.
- Industrial buffering allows the system to work during ERP and WAN outages.

CUSTOMIZATION THROUGH CONFIGURATION

Seamless Apis Wise data interfacing tools use configuration—not custom software—to integrate with any existing business software system, including the world's largest ERP systems such as SAP, Oracle and Microsoft Dynamics.

WISE WORDS

Some of the world's largest manufacturers and distributors have achieved an automated state of mind with our Pallet Labeling solution by **connecting output with outcome**, and strengthening their supply chains with automatic accountability and assurance.

*Pallet labeling was identified as the largest risk going into our go-live of SAP in North America. In the project wrap-up, pallet labeling proved to be the most successful part of the project due to Apis Wise, their solution, their **understanding of our business processes** and their team members.*

STEVE MCLAUGHLIN,
GLOBAL MANUFACTURING EXCELLENCE DIRECTOR, CASTROL

*We are investing millions of dollars in process improvement, automated palletizing and warehousing. Apis Wise was instrumental in helping us to identify and address the impact of automation on our processes at **case coding, quality control, track and trace and pallet labeling**.*

the beautiful foods company™

MIKE EVANS, SENIOR VICE PRESIDENT OF OPERATIONS, BELLISIO FOODS, INC.

*Apis Wise worked with our printer applicator supplier to overcome the physical hurdles of labeling, worked with our wrapper vendor to automate recipe selection, and interfaced with our ERP software to **manage the data transfer to and from our ERP**. The overall experience with Apis Wise was one of the best we have ever had and the solution is highly robust and reliable.*

MARCUS MCKEE, CFO, SPR PACKAGING
